Mr. Timothy Moore
Moor Innovative Technologies, LLC
4319 67th Ave CT E
University Place, WA 98466

Dear Mr. Moore:

It was a sincere pleasure to meet you and your colleagues at the Institute for Shock Physics' Applied Sciences Laboratory in Spokane last month. Thank you for visiting us and for sharing information about your MITgel Body Armor technology.

The MITgel Body Armor appears to be promising technology, based on the data that you provided in your report and during our meeting. Having served as a Member of the National Academy of Sciences' Committee on Testing of Body Armor Materials for Use by the U.S. Army (2009 - 2012), I am very familiar with the significant need to advance body armor technology to save lives of the brave soldiers who serve in our armed forces. My compliments to you and your colleagues for addressing this important need.

My colleagues and I are available and interested in further interactions with you and your team to explore the path forward for implementing your technology.

Sincerely,

Y. M. Gupta
Regents Professor, Department of Physics and Astronomy;
Director and Creighton Distinguished Professor, Institute for Shock Physics
